

THE WINDOW SOURCE®

Where America Shops for Windows and Doors

“The Easy Way to Purchase Windows for Your Home.”

THE WINDOW SOURCE®

- your smart choice

The Window Source is the easy way for American homeowners to purchase windows for their home.

Our process is an easy, no-pressure way to select high quality energy efficient windows for your home at the best price.

Your new windows are custom manufactured to fit the exact dimensions of your existing openings. Our installers are factory trained to work with custom windows and doors.

There is a full line of styles and options to choose from to compliment the unique style of your home.

Need new windows for your home?

The Window Source makes it easy!

Our 4 Step Installation Process

1 Custom Manufactured

After your window consultant inspects and measures your openings, your new windows are custom manufactured for a precise fit. Before leaving our state-of-the-art manufacturing facility, your new windows are inspected to insure your complete satisfaction.

2 New Windows Installed

Your old windows are removed and your new windows are installed and fully insulated. The new windows are squared and plumbed to provide a good fit and proper operation. A bead of high performance sealant is applied around the entire perimeter to properly seal the installation.

3 Custom Exterior Cappings Installed (optional)

If you choose this popular option you will never have to paint the exterior casings around your new maintenance-free windows. Our installer will custom cut and fit aluminum capping material with a maintenance-free finish.

4 Final Adjustment and Inspection

Your new windows are inspected and any necessary adjustments are made for proper operation. All old windows and debris from the job are removed. All work areas are thoroughly cleaned up. You are then presented with a satisfaction survey.

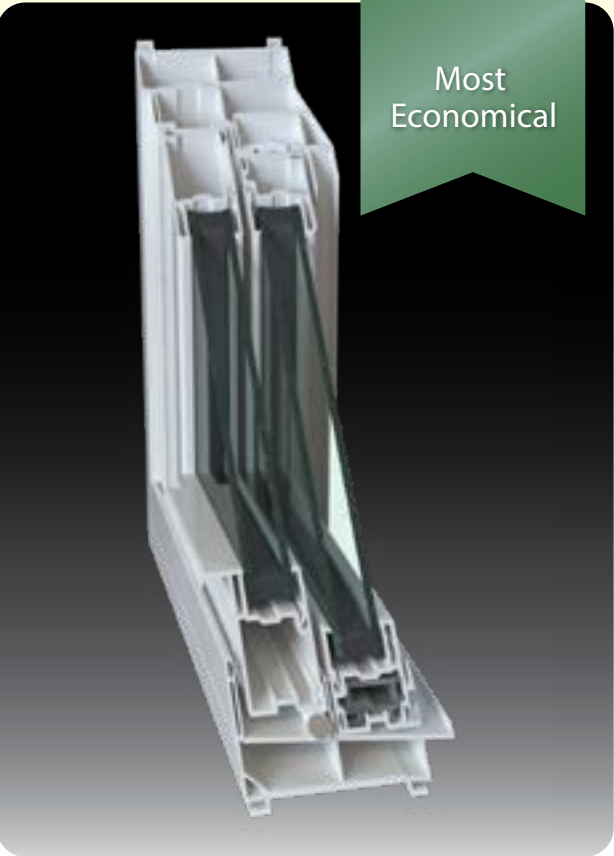

Standard On All Models:

- All frame and sash corners are fusion welded at 45 degrees to eliminate air and water
- Dual Glaze using SilverGuard^{3™} double strength glass for maximum SHGC and UV protection – standard 7/8" IG
- DH performance rating DP35 with optional DP45 performance packages
- Multi-chambered frame and sash components with heavy wall thickness for enhanced structural and thermal performance
- Full aluminum reinforced meeting rails provide exceptional strength and peace of mind.
- Tilt in sashes using patented EasyClean[™] tilt latches for easy cleaning and maintenance.
- KidSafe[™] Hardware provides you with a safe, lead free locking system with proven durability for your home.
- Dual FinSil weatherstripping providing ultimate air and water infiltration protection and structural ratings.
- True slope sill naturally drains rainwater away from window.
- Top and bottom sashes tilt in for easy cleaning (DH)
- Custom fit for your openings
- Warm edge no metal Enviroseal NXT[™] by Super Spacer[®] system to provide the optimal return on energy savings.

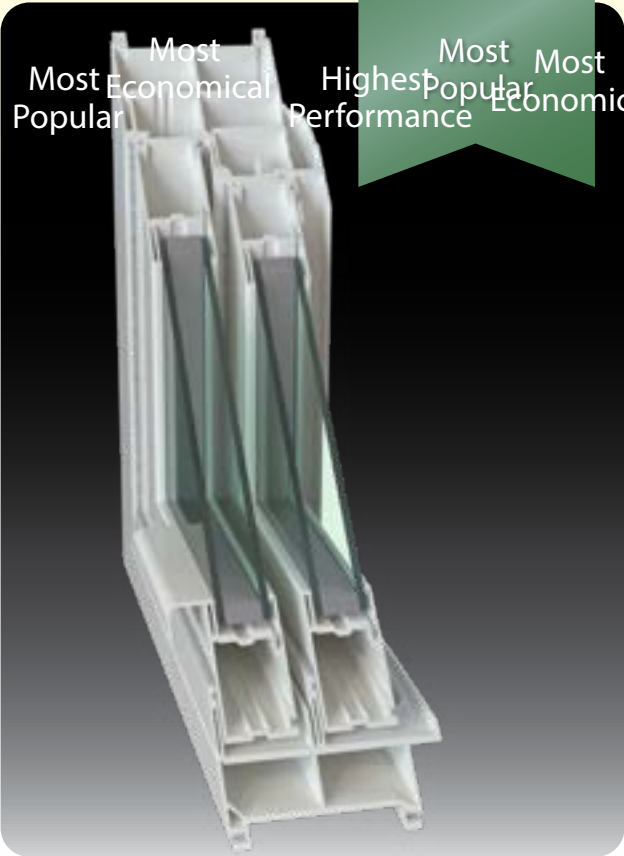

Enhance your windows with these options:

- Triple glazing with Energy Miser 2 (select models) to maximize your window performance and energy savings

Save With ENERGY STAR®

Installing ENERGY STAR qualified windows lowers energy bills and save you money over single-pane and even newer double-pane clear glass windows. Our windows with our high performance glass packages are ENERGY STAR qualified for all regions.

Source: ENERGY STAR for Single-Family Housing, All-Weather Energy Performance, and All-Weather Energy Performance. Savings estimates are based on energy simulations performed by Lawrence Berkeley National Laboratory (LBNL) using ENERGY 1.0 for typical homes in U.S. climate zones.

How Does Our High Performance Glass Technology Reduce Energy Loss?

A special LowE (low emissivity) metallic coating reflects radiant heat out and away from entering your home in the hot summer months. In the cold winter months when the sun is lower in the sky, the radiant heat may enter since the LowE coating is selective based on the angle of the radiant heat. Also in the winter the coatings reflect radiant heat that you paid for back into your home performing double duty. Almost all visible light passes through so your home remains bright. Our special LowE coatings also filter out damaging UV radiation to increase the lifetime of you carpets, draperies and furniture. Argon gas, which is much more dense than air, is pumped into the IG unit which reduces conduction of heat and cold through the unit. Our warm edge spacer technology reduces conduction around the

Decorative Options

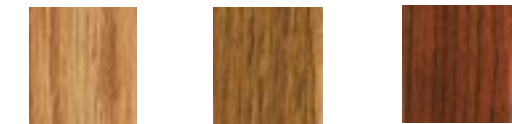

Interior Color Options

Interior Solid:

Almond Cream White Sandstone Midnight
Only available with a Midnight Exterior

Interior Wood Grains:

Light Oak Dark Oak Cherry

Wood Grains are available in 6000 and 9000 series only, Sandstone and custom exterior colors are available in 6000 and 9000 series only.

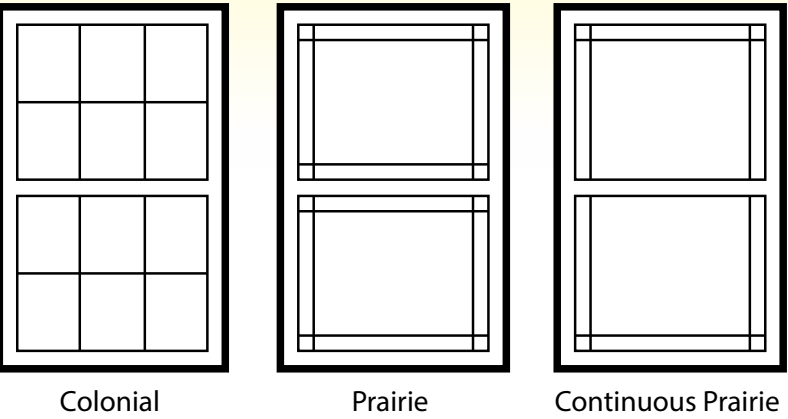

Color Match option is available to match almost any color that you need.

Custom Exterior Colors

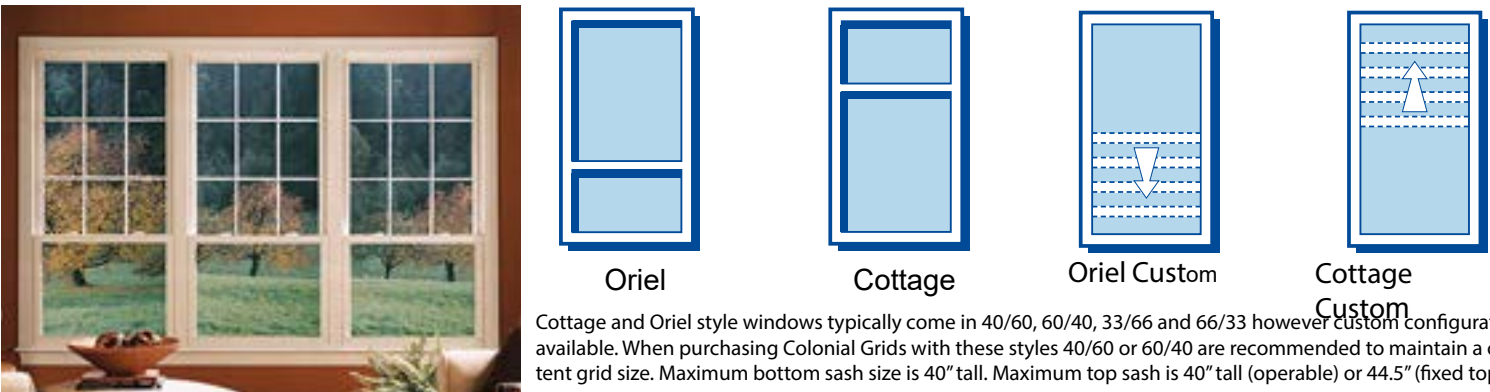

Printing limitations prevent exact replication of colors and finishes. View window sample or color swatch for actual color and finish.

Most Common Grid Patterns:

Oriel and Cottage Style Windows (available in all series)

Cottage and Oriel style windows typically come in 40/60, 60/40, 33/66 and 66/33 however custom configurations are available. When purchasing Colonial Grids with these styles 40/60 or 60/40 are recommended to maintain a consistent grid size. Maximum bottom sash size is 40" tall. Maximum top sash is 40" tall (operable) or 44.5" (fixed top sash).

Satin Glass

Single-Hung, Double-Hung & Picture Windows

This 6000 series single-hung features an interior dark oak wood grain finish.

Double-hung windows from The Window Source are just the right look for many American home designs. Optional colonial grids are perfect for many styles of homes. Both top and bottom sashes tilt in for easy cleaning on all double-hung models. Tilt latches lock the window back into the upright position when finished cleaning. Ventilate from either the top or bottom sashes with standard half screen or from top and bottom with optional full screens. Every series is also available in a single-hung version with optional geometric round tops. Combine picture windows with either single-hungs, double-hungs or casements to open up your view.

This picture window flanked by two double-hung windows in white features colonial grids.

This picture window is flanked by single-hungs.

These double-hung windows feature standard white color with optional colonial grids.

Reinforced meeting rails provide exceptional strength and anchors hardware.

Double ventilation latches let the breeze in while adding security.

Casement, Awning and Slider Windows

Nothing opens up the view like a casement or awning style window from The Window Source. Heavy duty operating crank hardware opens the window to 90° for full ventilation (45° with awning). Casements are the perfect solution for those hard to get to areas like above the kitchen sink. Combine into multiple units or with picture windows to compliment your home's architecture. A heavy duty multipoint locking system secures the window tightly when closed.

These windows feature our Model 9000 Casement and Fixed Casement window in White with geometric transoms.

Our Model 9000 Casement features a multi-pocketed design for strength and durability with folding and nesting hardware for easy operation.

This Two-Lite sliding window features standard white color.

This Three-Lite Slider provides an expansive view.

Many ranch style homes are designed around the look of the horizontal sliding window. The Window Source has both two and three-lite sliders to maintain the unique appearance of this architectural style. Sliding panels glide horizontally and lift out for cleaning. The center fixed lite of the three-lite model can be either one half or one third width.

Bay & Bow Windows

Enhance your home's curb appeal with a Bow or Bay window from The Window Source.

Bow and Bay projecting windows from the Window Source add a new depth and dimension to your home's architecture. And you can replace a regular window with one of our projecting styles since they are custom made to fit any existing opening. Your new bow or bay can be filled with any combination of double-hungs, casements and picture windows.

This bow in White features a picture window flanked by operating casements for ventilation on each side.

This four-lite bow window in Light Oak features operating casements for ventilation on each side.

This white bay window features a center picture window flanked by casement operating units.

Garden (Swing-in) Patio Doors

This two-panel Garden door in white features Satin Nickel hardware. Garden Patio door hardware color option shown.

Sliding Patio Doors

Invite the outside in with our beautiful Garden or Sliding Patio Doors. Replace that old, drafty and inefficient door with our Window Source patio doors. These doors feature durable and weather-tight all welded construction, high performance Energy Miser insulated glass, choose Energy Miser 2 triple glazed for maximum performance and a wide array of options to make this door your door. Sliding Patio Doors feature a unique double locking system and Garden Patio Doors feature a multi-point lock, both providing enhanced security.

This 2 panel sliding patio door

Handle Options for Sliding Patio Doors

The Window Source Garden and Sliding patio doors are reinforced with extruded aluminum for long-lasting strength and durability. Personalize your style with grids, integral mini-blinds (inside the insulated glass unit to eliminate cleaning of the blinds) or our designer handle color options. Sliding patio doors are available in 2,3 and 4 panel styles. Garden door is available in single and 2 panel.

Peace of Mind Assurances

Lifetime Warranty

All Window Source products come with a limited lifetime warranty. You will have peace of mind knowing that you will only make this investment in your home once. Ask your window consultant for details.

Best Price Guarantee

We are confident that you will not find a better price for equal products and services anywhere. If you can we will refund the difference. Ask your consultant for our written best price guarantee at participating locations.

Independently Certified NFRC Labels

All Window Source products come with voluntary National Fenestration Rating Council (NFRC) labels so that you can compare with confidence. You can rely on the labels and forget about all the sales gimmicks that you may hear from companies charging much higher prices. In fact the US EPA relies on NFRC data to set its ENERGY STAR® guidelines.

ENERGY STAR® Qualified Products

Be assured that you will gain valuable energy savings when you choose one of our High Performance Glass options. All of our products will meet ENERGY STAR® guidelines when ordered with the appropriate High Performance Glass option optimized for your climate zone.

No other source gives you such peace of mind and ease when choosing new windows for your home. Join our growing family of satisfied customers at The Window Source where America shops for windows and doors.
